**THE PURPOSE**

Once told by doctors I would most likely never get out of bed and be forced to live quite a stagnant life, I've defied a lot of odds and come a long way. But I still have further to go and much more to do!

I credit a large part of my progress to the ongoing physical therapy I receive. The sole purpose of the Stand Strong Fundraiser is to raise money to help cover my physical therapy expenses.

Because of the physical therapy I receive, I am able to maintain an active presence in the community. Going out with friends, traveling to my speaking gigs, hanging out with Bruce Springsteen, etc. I truly believe I have progressed as well as I have in large part due to the physical therapy I have received.

When it comes to a spinal cord injury, physical therapy is such a vital part of maintaining good health. It aids in improving blood circulation, maintaining bone density, increasing muscle mass and warning off atrophy and helping with cardiovascular health. Not to mention the psychological and emotional benefits that staying active can provide, especially for someone who is forced to spend their time in a wheelchair.

Unfortunately, all too often physical therapy is not covered by insurance and individuals are forced to pay for it out of their own pockets. It can be very expensive, averaging more than \$100/hour.

The goal of the Stand Strong Fundraiser is two-fold:

- (1) Assist in the purchase of a special exercise bike called an RT 300 FES bike, which is designed specifically for individuals with spinal cord injuries and paralysis. Electrodes are hooked up to the individual's legs and arms. Electrical pulses stimulate the muscles to contract, allowing the individual to pedal. It is all active motion, meaning, the individual uses his or her own muscles to pedal the bike. This way he or she achieves the same benefits as an able-bodied person would riding a stationary bike.
- (2) Continue my workouts at Buckeye Wellness Center – a fitness facility in Valley View that caters specifically to individuals living with spinal cord injuries. The gym offers aggressive exercise-based recovery, most of which is done with the individual out of his or her wheelchair.

Thank you in advance for all of the support you have shown me. Believe me when I say, I am truly grateful and blessed to have received your support!

Stand Strong!

*Scott*

**DANA L. DEPEW "MUSTARD COMPOSITION" ORIGINAL PAINTING**

**Oil, Acrylic and Latex on Vintage Chenille 2010**

**\$450 Value / Courtesy of the Artist**

Dana L. Depew is one of Cleveland's most prolific artists. He resurrects thrown out cast offs and found objects into wholly new and unique objects. He opened Asterisk Gallery in May of 2001. Located in the heart of Tremont, it has become one of Cleveland's and cutting-edge hotspots, whose main goal is to solely exhibit the work of local, up-and-coming Cleveland-based artisans.

- In his own words: In my most recent painting practice, I impose my being on the pre-constructed world. I attempt to resurrect the old and rejuvenate the mundane through the use of vintage chenille bedspreads, crocheted afghans, and other fabrics. Through the use of vibrant colors and a variety of oil and acrylic paints, I create an exciting bridge between a forgotten textile and painting.

**WALTER HORAK "LIFECYCLE" ORIGINAL SCULPTURE**

**Bronze Edition: 100; 16" x 22" (Wall piece)**

**\$1,500 Value / Courtesy of the Artist**

Walter Horak has exhibited widely throughout the United States over a thirty-year period. He has received numerous awards for sculpture, and his work is represented in private and public collections in the United States and abroad. He holds a B.A. Fine Arts, Harvard University, M.A.T. Rhode Island School of Design, M.F.A. University of Massachusetts Dartmouth.

- In his own words: The figurative tradition in sculpture is several millennia old, and contemporary artists continuing to produce human imagery face the inevitable challenge of making their work relevant or original. While respectfully accepting historical roots, I am attempting to extend that tradition, inspired by a notion advanced by art critic Donald Kuspit, who described sculpture as "metaphor-making in three dimensions".
